**Data Dictionary**

**2017/1**

## Introduction

The Scottish Postcode Directory contains the

- Postcode Index;
- Lookup tables;
- Digital postcode boundaries (which correspond to the live small user postcodes);
- Data Dictionary; and
- News Bulletin.

This document, the Data Dictionary specifies the content of the Postcode Index and lookup tables.

There are two versions of the Postcode Index; a full version which contains Royal Mail information and a cut version which excludes that information. The cut version is freely available and can be downloaded directly from the [Scottish Postcode Directory section](#) of our website. Customers requiring the full version should contact Geography Customer Services (email: [geographycustomerservices@nrscotland.gov.uk](mailto:geographycustomerservices@nrscotland.gov.uk)).

- The Postcode Index or table, simply indicates to which area a postcode belongs. There are two tables, SmallUser and LargeUser. More information about postcodes can be found in the [Background Information Note](#) in the Geography section of the National Records of Scotland (NRS) website.
- The lookup tables provide codes and names for each of the 'higher' areas listed in the Postcode Index.

## Higher area assignments

The higher area assignments provided in the Postcode Index, are provided via Point in Polygon (PiP) methodology that matches the postcode grid reference to the higher area boundaries. On occasion, some postcodes higher area assignments are imputed.

## Standard Names and Codes

NRS have implemented the new nine character code for statistical geographies. The Scottish Government (SG) maintains the Scottish Code History Database (CHDb) and is responsible for assigning new geographies with a nine character code. The 'Standard Geographic Codes Register – Scotland' is available on the ['Scottish Neighbourhood Statistics Reference Documents'](#) page of the SG website.

## Formats

The Postcode Index, and lookup tables are available in MS Access and Text formats.
